

IN THE SPECIFICATION:

Please amend the paragraph beginning on page 19, line 13, as follows:

To add the neutralizing agent to blood preparations containing the platinum compound after inactivation reaction for a desired period of time, for example, a container 8 containing a neutralizing agent is connected in advance to the blood bag 1 through a connecting tube having a valve as an opening and closing means and the valve is opened as necessary to introduce the neutralizing agent into the blood bag 1. Also, a neutralizing agent may be introduced into the blood bag 1 from the air-bleeding tube 10 by using a syringe or the like.
